Introduction: This guide is designed to help you purchase and set up a KVM 8 VPS server from Hostinger. No technical experience is needed. Follow each step carefully.

Step 1: Visit Hostinger's Website

1. Open your web browser.

2. Go to https://www.hostinger.com/vps-hosting.

Step 2: Choose the KVM 8 VPS Plan

1. Scroll through the VPS hosting plans.

2. Find the plan labeled "KVM 8".

3. Click **Order Now** or **Buy Now**.

Step 3: Create an Account or Login

1. If you already have a Hostinger account, click **Login** and enter your credentials.

2. If you don't have an account, click **Sign Up**.

   o Enter your email.

   o Create a password.

   o Confirm the account through your email.

Step 4: Configure Your VPS

1. **Choose Server Location:** Select the location closest to your users for faster performance.

2. **Choose Operating System:** Pick Linux (Ubuntu)

3. **Add Extras (Optional):** You may see options like backup services, additional IP addresses, or management tools. You can skip these if unsure.

Step 5: Payment

1. Review your order summary.

2. Select a payment method (Credit/Debit Card, PayPal, etc.).

3. Complete the payment.

4. Once payment is successful, you'll receive a confirmation email with your VPS details.

Step 6: Accessing Your VPS

1. Log in to Hostinger.

2. Go to **VPS Dashboard**.

3. Click **Manage** next to your new KVM 8 VPS.

Step 7: Contact Support if Needed

1. Hostinger offers 24/7 live chat support.

2. If you face issues, click **Help** or **Support** on the dashboard.

Congratulations! Your KVM 8 VPS server is now ready for use. You can now host websites, applications, or other services on it.
